

James Moorman

Eden Prairie, MN 55347 | 651-270-4656 | jpmoorman@gmail.com

Professional Summary

AI and operations technology leader with experience building internal software, automation workflows, and data-driven decision systems across manufacturing, quality, distribution, program management, and commercial operations. Hands-on builder of React and Python applications, AI-assisted development workflows, and system integrations that connect CRM-adjacent processes, document control systems, warehouse systems, and operational data platforms. Record of delivering measurable business outcomes through workflow reliability, adoption, and process modernization.

Core Competencies

- AI Workflow Engineering: LLM-assisted development, prompt frameworks, reusable implementation patterns, workflow automation, decision-support tooling
- Software Engineering: React, Python, APIs, internal web applications, service patterns, validation logic, production workflow tooling
- Data and Analytics: SQL, Microsoft Dataverse, Azure Cosmos DB, dashboards, reporting automation, operational analytics
- GTM and Operations Systems: Salesforce-adjacent workflows, document control systems, warehouse and manufacturing systems, approval workflows
- Leadership and Execution: Cross-functional delivery, stakeholder alignment, program execution, adoption tracking, executive reporting

Professional Experience

Starkey Laboratories

Senior Manager, AI-Accelerated Software Development and Operations Technology (Previously Program Manager)
09/2022 - Present

- Lead development of internal software, AI-enabled workflows, dashboards, and integrations across manufacturing, quality, distribution, program management, and commercial operations.
- Built unified internal software experiences using React front ends and Python back ends, with reusable interface and service patterns across workflow tools.
- Connected Salesforce-adjacent workflows, warehouse systems, document control systems, Dataverse, Cosmos DB, SQL, APIs, and custom web tools to reduce fragmented process execution.
- Replaced Excel-heavy operating processes with centralized data models, shared dashboards, and workflow applications.
- Partner with operations, quality, IT, engineering, sales support, and executive leadership to define requirements, deploy solutions, and measure adoption.
- Present weekly execution and risk updates to C-suite leadership.

Selected Outcomes - Improved order accuracy from 97% to 99.7% in 3 months through custom warehouse workflow tooling. - Increased shipment capacity from 1,800 to 4,200 shipments per day. - Reduced overhead costs by \$2.2M annually and identified approximately \$634k annual incorrect-order overnight shipping exposure. - Reduced documentation cycle time from 8 weeks to 4 weeks through validation graphing and research tooling. - Reduced annual packaging and shipping expenditures by approximately \$1.7M, including approximately 12% shipping savings from service-level optimization. - Built reusable AI and automation implementation patterns for moving from prototype to operational workflow tools.

Representative Systems Delivered - Warehouse management and correction dashboards integrating pick, routing, and fulfillment workflows. - Orbit controlled-access document viewer for approved source-document access in production environments. - Electronic traveler workflow for injection molding with job-to-document traceability. - MES-style

manufacturing execution workflows improving visibility, traceability, and operational control. - Program and project management tooling on Power Platform and Dataverse with automated leadership reporting.

Monteris Medical

Senior Engineer / Documentation Systems Lead

12/2020 - 08/2022

- Led development, verification, validation, and launch of a new MRI-compatible product for shallow tumor treatment within 18 months.
- Built a MediaWiki-based documentation control system to move static engineering and quality documents into a controlled, searchable platform.
- Improved documentation traceability, version governance, and team access to design history and technical references.
- Managed product delivery from concept through launch with timeline, budget, quality, and regulatory alignment.

Selected Outcomes - Supported launch generating approximately \$25k in weekly revenue and 2,600 units sold in the first year.

Donaldson

Product Manager

02/2018 - 12/2020

- Supported major enterprise customers including General Motors, Convatec, and Samsung through product development and solution planning.
- Built and presented strategic plans to senior leadership for product and business execution alignment.
- Developed new revenue pipelines during the pandemic through market and network development.
- Delivered semi-annual business development strategy updates based on market and budget conditions.
- Presented nationally on battery longevity and safety in electric vehicle contexts.

Whiteboard Product Solutions

Product Development Consultant

08/2011 - 02/2018

- Conducted human factors and market research to guide product development decisions.
- Collaborated across engineering, industrial design, and business stakeholders from concept through prototyping and launch planning.
- Supported clients in medical, industrial, consumer, and commercial segments on manufacturability, usability, and product-market fit.

Education

- MBA, Business Administration - Quantic School of Business, Washington, D.C.
- BS, Mechanical Engineering - University of St. Thomas, Saint Paul, MN

Technical Skills and Tools

- AI and Developer Tools: OpenAI Codex, Claude Code, OpenCode, Windsurf, GitHub Copilot, prompt frameworks, agent-style workflows
- Languages and Frameworks: Python, React, SQL
- Platforms and Data: Azure, Azure Cosmos DB, Microsoft Dataverse, Microsoft Fabric concepts, Power Platform, Power BI
- Automation and Workflow: Power Apps, Power Automate, approval workflows, document review support, workflow tracking
- Systems and Domains: Salesforce-adjacent workflows, warehouse systems, pick-to-light, manufacturing systems, document control, Windchill, Grand Avenue, MediaWiki
